

## PACCAR Genuine Extended Life Coolants

PACCAR Genuine Extended Life Coolants are premium grade products specifically selected to be first fill products in both Kenworth and DAF trucks. Offering extended change intervals they give outstanding protection against frost, corrosion and overheating and aid in protecting all cooling system components and vital coolant channels in the engine block, cylinder head and heater core.

### PACCAR Genuine ELC40

PACCAR Genuine ELC40 is a Silicated Organic Acid Technology (Si-OAT) coolant and is still first fill in all Kenworth's built with a Cummins Engine from week nine 2016 and meets Cummins Specification CES 14603.

### PACCAR Genuine ELC30

PACCAR Genuine ELC30 is an Organic Acid Technology (OAT) coolant and is first fill in all PACCAR Engines meeting PACCAR Specification 74002.

To ensure the optimal performance of PACCAR Genuine Extended Life Coolants, it is recommended that they are not mixed with any other coolant. Always follow OEM instructions and recommendations for service procedures and coolant change intervals.
